

# Vitrification in Assisted Reproduction

Second Edition

**Edited by**

**Michael J. Tucker, PhD, FIBiol, HCLD(AAB)**  
Director of IVF and Embryology Laboratories  
Shady Grove Fertility RSC  
Rockville, Maryland, USA

**Juergen Liebermann, PhD, HCLD(AAB)**  
Director of Embryology, Andrology &  
Endocrinology Laboratories  
Fertility Centers of Illinois  
Chicago, Illinois, USA

Foreword	ix
Preface	xi
Acknowledgments	xiii
Contributors	xv
<b>1 Overview of biological vitrification</b> <i>Gregory M. Fahy</i>	1
<b>2 Vitrification of oocytes and embryos: Finally a recognized technique, but still a source of concern and debate</b> <i>Pierre Vanderzwalmen, Nicolas H. Zech, Fabien Ectors, Yannis Panagiotidis, Achillae Papatheodorou, Prapas Yannis, and Barbara Wirleitner</i>	23
<b>3 Intracellular concentration of cryoprotectant during vitrification and slow-freezing cryopreservation procedures</b> <i>Pierre Vanderzwalmen, Fabien Ectors, Barbara Wirleitner, Astrid Stecher, Deborah Desmet, Jacqueline Greindl, Amandine Helson, Sabine Vanderzwalmen, Mark G. Larman, Nicolas H. Zech, and Delphine Connan</i>	35
<b>4 Importance of cooling versus warming rates in vitrification techniques</b> <i>Shinsuke Seki</i>	43
<b>5 The movement of water and cryoprotectants in mammalian oocytes and embryos: Membrane permeability and aquaporins</b> <i>Keisuke Edashige and Magosaburo Kasai</i>	47
<b>6 Open versus closed systems</b> <i>Mark G. Larman and Pierre Vanderzwalmen</i>	55
<b>7 Automatic vitrification: Development of the Gavi system</b> <i>Tammie K. Roy, Susanna Brandi, Cara K. Bradley, and Teija T. Peura</i>	61
<b>8 Vitrification at minimum volume: From basic science to clinical application</b> <i>Amir Arav</i>	69
<b>9 Vitrification of oocytes: General considerations and the use of the Cryotec method</b> <i>Masashige Kuwayama</i>	77
<b>10 Safety of vitrification and cryostorage and optimization of cryopreservation protocols</b> <i>Lodovico Parmegiani and Marco Filicori</i>	87
<b>11 Physiological aspects of oocyte vitrification</b> <i>Mark G. Larman and David K. Gardner</i>	95

CONTENTS

<b>12</b>	<b>Vitrification of oocytes: Imprinting and disturbance in spindle formation and chromosome segregation</b>	105
	<i>Tom Trapphoff</i>	
<b>13</b>	<b>Metabolic profile of day 3 embryos arising from vitrified oocytes</b>	117
	<i>Damià Castelló and Francisco Domínguez</i>	
<b>14</b>	<b>Vitrification of human oocytes for <i>in vitro</i> fertilization patients</b>	125
	<i>Laura Rienzi, Benedetta Iussig, and Filippo Maria Ubaldi</i>	
<b>15</b>	<b>Oocyte vitrification: Donor “egg banking”</b>	129
	<i>Zsolt Peter Nagy, Ana Cobo, and Ching-Chien Chang</i>	
<b>16</b>	<b>Fertility preservation for oncology patients</b>	137
	<i>Kara N. Goldman, Caroline McCaffrey, and Nicole Noyes</i>	
<b>17</b>	<b>Vitrification of human ovarian tissue</b>	147
	<i>Mona Sheikhi and Outi Hovatta</i>	
<b>18</b>	<b>Vitrification of cleavage-stage embryos and blastocysts and their neonatal outcomes</b>	151
	<i>Tetsunori Mukaida and Chikahiro Oka</i>	
<b>19</b>	<b>Vitrification of human blastocysts: Clinical realities and neonatal outcomes</b>	163
	<i>Juergen Liebermann</i>	
<b>20</b>	<b>Development and hatching of human blastocysts after vitrification and warming</b>	175
	<i>Joe Conaghan and Sergio Vaccari</i>	
<b>21</b>	<b>Does storage of vitrified blastocysts have an impact on implantation potential and birth rate?</b>	185
	<i>Barbara Wirleitner, Nicolas H. Zech, and Pierre Vanderzwalmen</i>	
<b>22</b>	<b>Ovarian tissue vitrification—Clinical realities and outcomes</b>	191
	<i>Sherman Silber</i>	
<b>23</b>	<b>Vitrification of human testicular tissue, spermatogonia, and spermatozoa</b>	197
	<i>Christine Wyns, Gael Abou-Ghannam, and Jonathan Poels</i>	
<b>24</b>	<b>Vitrification in pluripotent stem cell banking: Requirements and technical solutions for large-scale biobanks</b>	203
	<i>Julia C. Neubauer, Axel F. Beier, Frank Stracke, and Heiko Zimmermann</i>	
<b>25</b>	<b>Scrying the future: The ongoing transformation of reproductive medicine through vitrification</b>	225
	<i>Kevin S. Richter, James R. Graham, and Michael J. Tucker</i>	
	<b>Index</b>	239
